

## Sustainable living ambassadors at your doorstep!

The transition of the Pirkanmaa region is happening. Join us to make our region a sustainable place for the future.

We are **creating a network of transition centers in 7 cities of the region**. In these centers, supported by motivated eco-transition agents, you will learn, share and find expertise to **support your sustainable living** in many ways.

The centers would **organize events**, provide a forum, **bring people together** and **empower communities** for the transition to raise more awareness.

The centers are a safe environment for people to be informed and find different types of resources.

The centers are **creating new jobs** and are closely working with the local communities around capacity building and education.

Community garden, indoor vertical farm

Mini-Ekothons

Eating together, social kitchen

Ride-sharing

Art competitions and other art-based activities

Events for all ages

Challenges: funding, time, creating a new profession, to find the right team, Integration
