NAMING   FORMING   FOSTERING

Purpose:
This project will focus on moving health care evidence into practice, by building nursing professionalism for frontline nurses.
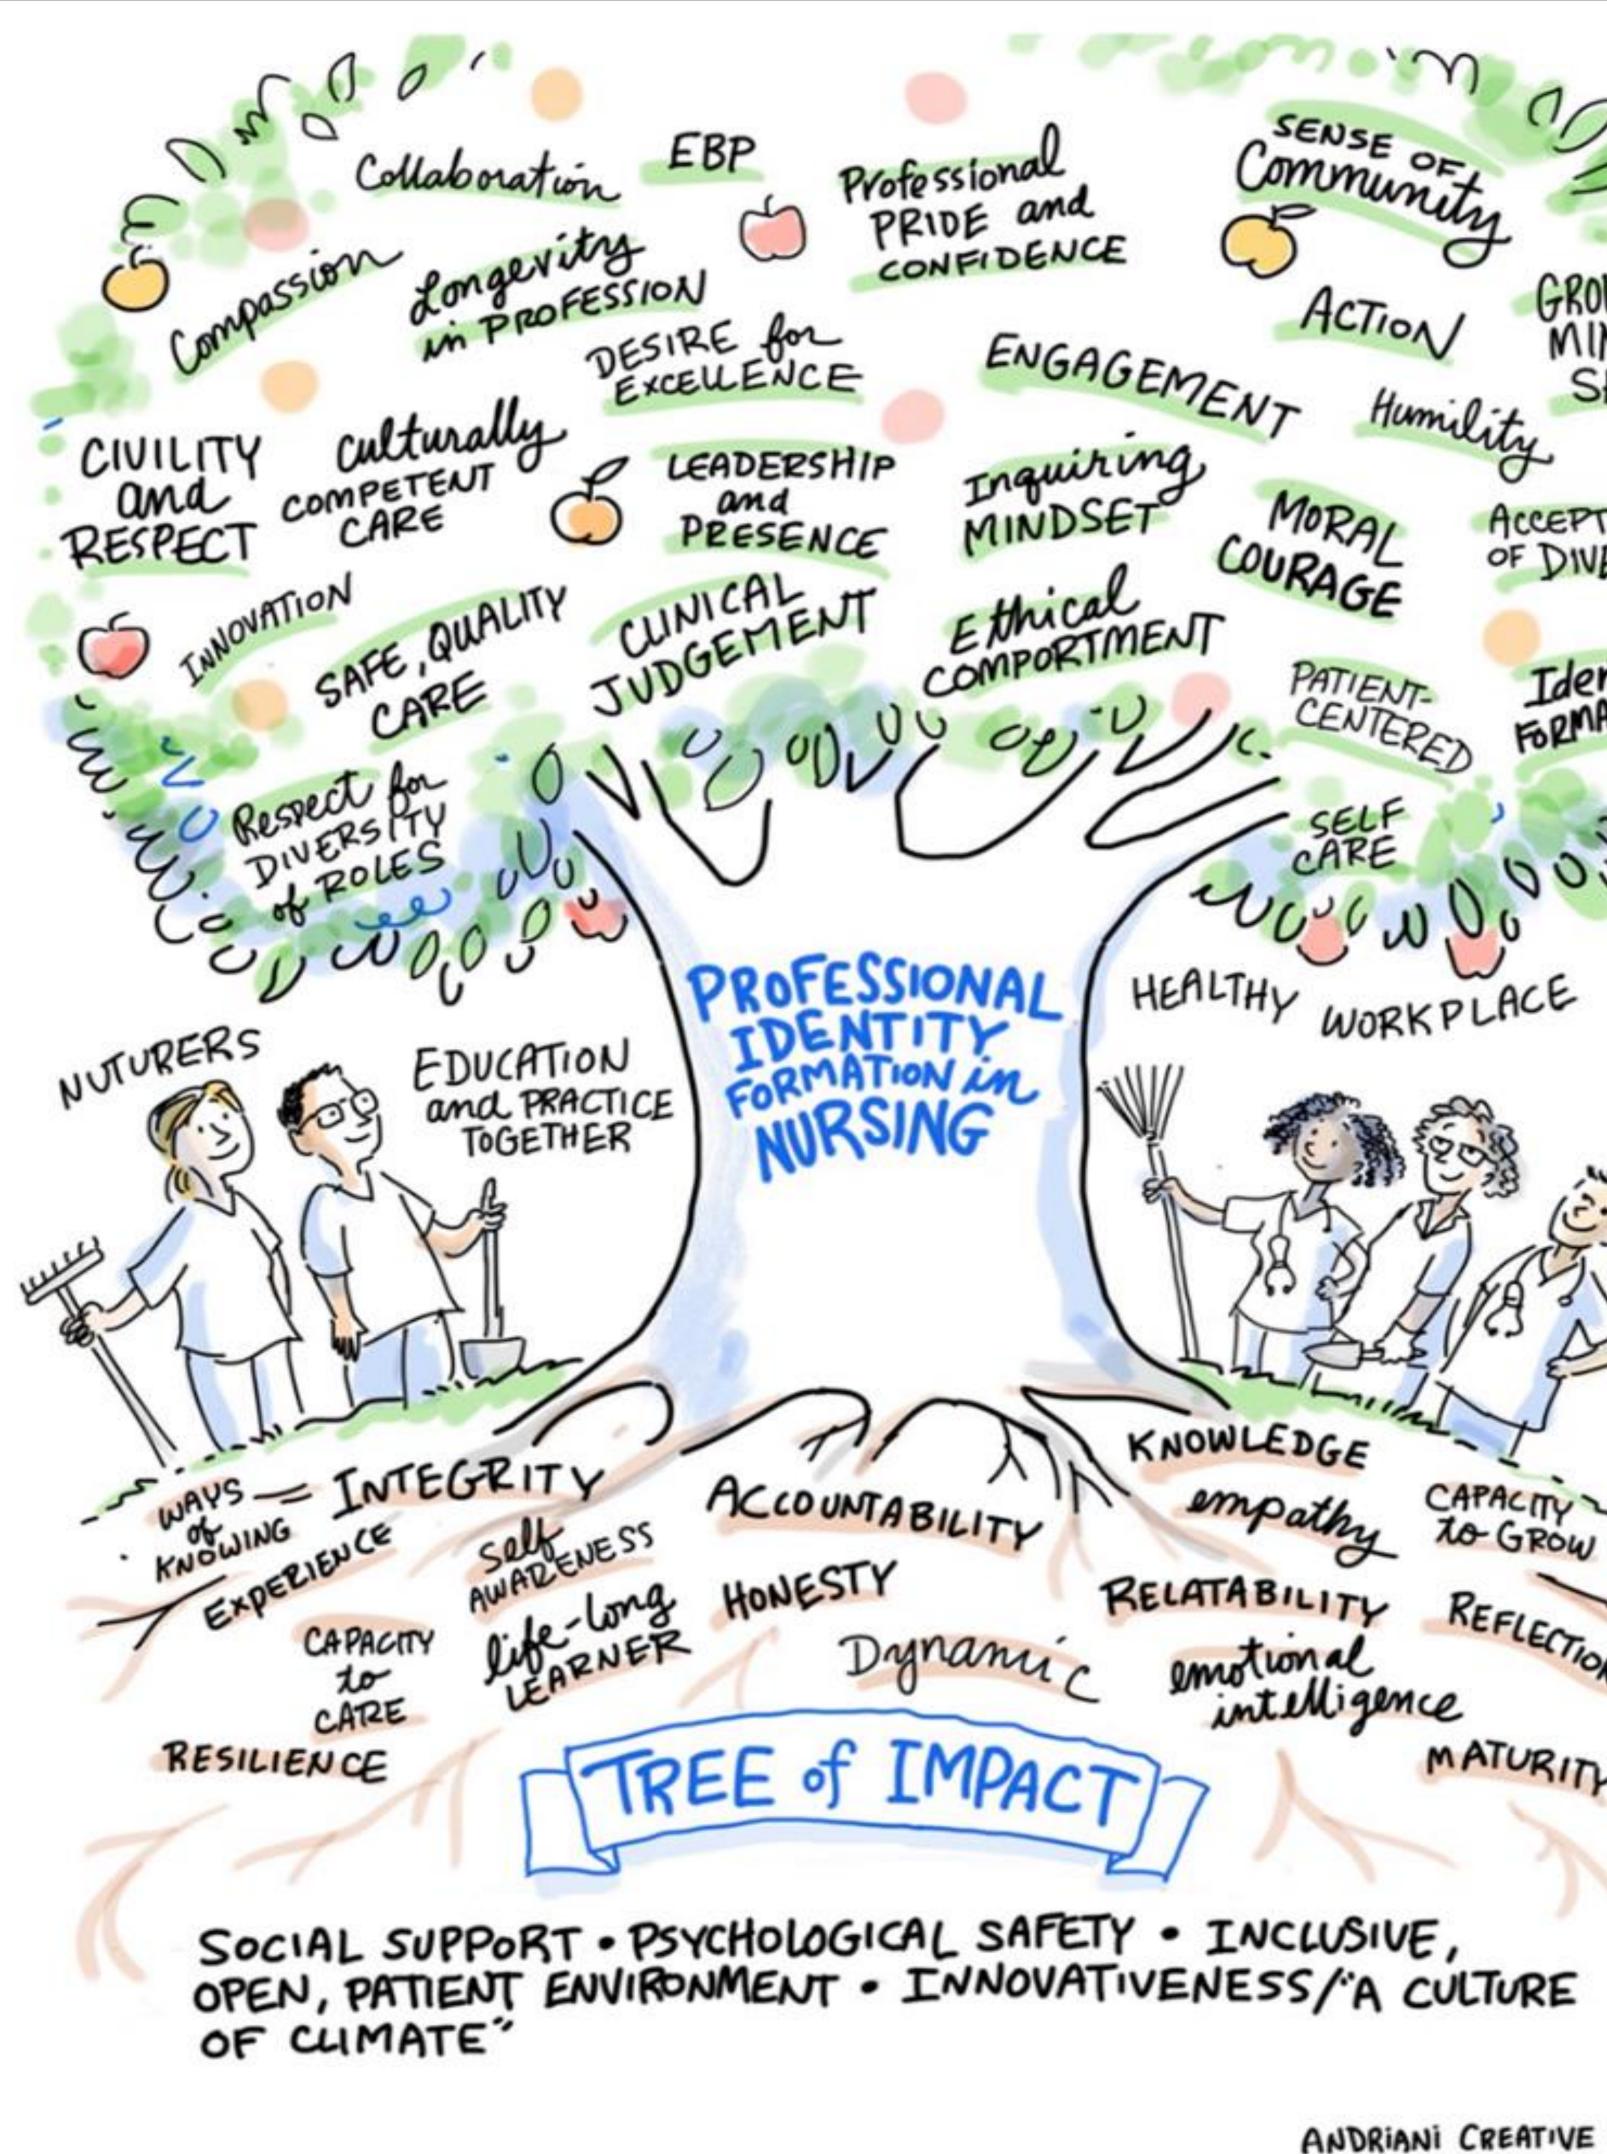

Professional Identity in Nursing
is a sense of oneself, and in relationship with others, that is influenced by characteristics, norms, and values of the nursing discipline, resulting in an individual thinking, acting, and feeling like a nurse.

Domains — Knowledge, Leadership, Values & Ethics, Professional Comportment → Professional Identity in Nursing

Tree of Impact
Created at the first Professional Identity Think Tank
September 2018

Conclusions
- Frontline nurses must cultivate and adopt, naming, forming, and fostering of

Professional Identity in Nursing.
- They are the faces and representatives of the identity.

Implications and Next Steps
for education, practice and regulation.
- Solidify Professional Identity Formation in Nurses
- Conduct National and International Surveys to gather information and initiative
- Dissemination of findings through presentations and publications
- Development of Competencies based on the Domains
- National Forum on Professional Identity **September 2020 Kansas City**
